STONY PLAIN, ALBERTA THURSDAY, JUNE 23, 1927.

Whole Number 359

The Red Cross appeals to YOU for support

SINCE the War, the Red Cross has disbursed over Seven Million Dollars for the Soldiers, Women, Children and Frontier Families of Canada.

About half of this has been spent for disabled soldiers—half in the other services of the Society about which you have been told. The Treasury is almost empty.

\$1,000,000 Needed Now for Red Cross Work

The Red Cross brings cheer to our disabled warriors and their families. It stimulates the children of Canada to healthy living and good citizenship. It relieves suffering, and brings skilled attention to Canada's frontier districts remote from other aid. Its work is indispensable.

It now appeals to YOU, as a patriotic and humane Canadian citizen, to contribute generously to its need for funds.

The Mosquito Pest

The people of Canada are slowly awakening to the necessity of concerted, aggressive action to destroy the breeding places of mosquitoes. Like so many other things which we stupidly put up, the mosquito pest can be practically eliminated if we go the right way about it, and become fully convinced that prevention is worthwhile. The mosquito is not only a source of irritation and pain, but it is an actual menace not only to human beings but to dumb animals as well.

The United States succeeded in constructing the Panama Canal, where the French had failed, largely because the American engineers tackled the problem of first destroying the mosquitoes and flies which made life unbearable in the Panama zone and were the prolific carriers of disease and fever among the workmen. Panama had first to be made a fit place in which to live and work before the canal could be built. And the campaign which was successfully conducted there has been followed elsewhere in the southern states.

Apart altogether from the discomfort to humans, and the communication of disease for which the mosquito is responsible, the fact is that the country sustains an economic loss as a result of the tortures endured by horses, cattle, and other animals in the open where mosquitoes thrive unmolested and these dumb creatures have no means of protecting themselves. The question has well been asked, how can animals upon which farmers rely for work and production yield normal production under such conditions? Anything that will eliminate the mosquito and free horses and cattle from the irritation which they now must undergo would be worth a small fortune.

Mosquito elimination campaigns are now in progress at Banff, Ottawa, Winnipeg, and in the Fraser River Valley, and every community which suffers from this pest would be well advised to follow their example. Inasmuch as the scientific facts upon which mosquito control is based are of general public interest, we quote the following from Toronto Saturday Night, which is urging governments to take the lead in these campaigns.

The life-history of the mosquito shows that most of the eggs are laid the previous summer in this latitude, either in stagnant pools or in places that will become stagnant for a sufficient length of time in the spring. Barrels, old cans, broken bottles, or any water-containing vessels lying in the open are also favorite breeding places. Rivers, or running streams do not breed mosquitoes, but flood waters and snow-pools may prove rare sources of the pest. Larvae and golf courses, open grass and shrubberies do not breed mosquitoes. The eggs are laid in stagnant water, or where there will be stagnant water for a sufficient length of time.

Pools that dry up in two or three weeks are of no consequence. The eggs are not affected in the least degree by frost, but hatch out about April 15th, sometimes earlier, into wigglers, or larvae, as scientists call them. These wigglers swim and feed in the stagnant pools, rising every two or three minutes to the surface, to take in air. On the tail is a fine air tube, which is thrust just above the surface to take in air—without which the wigglers cannot live. After two or three weeks of this existence the wigglers change into common shaped pupae, which in from two to seven days come to the surface, split, and liberate the complete mosquito.

Thus, in the life cycle of the mosquito, the most readily destroyed in the wiggler stage by placing on the surface of the pools a thin film of crude oil, a cheap commodity, which chokes or poisons the fine air-tube at the end of the wiggler's tail. This is applied either by watering cans or by kyanol sprayers. Small areas may be successfully handled by individuals with coal-oil or crank-case waste oil from automobiles. Rags, soaked in these substances, may be weighted with stones and laid in pools.

In these days of machinery on the farm and the almost universal use of automobile, there are oil soaked rags about; dirty waste oil after cleaning out automobile crank cases and parts of tractors and other machinery, and if these waste substances, instead of being burned, were thrown into stagnant pools of water and other breeding places of the mosquito, the result would be beneficial. The general adoption by people of the policy of spraying oil into stagnant pools in the vicinity of their homes would in a few years greatly reduce the mosquito pest in this country, adding to the pleasure of life in the summer months, assisting to check the spread of fevers, and being economic gain, as well as relieving our dumb animals of the suffering they now undergo.

Additional information on the subject of mosquito control can be obtained by writing the Dominion Entomologist at Ottawa.

Carry Out Death Sentences

Seventeen Persons in Canada Sentenced to Death and Nine Executed in One Year

Canadian courts pronounced the sentence of death upon a total of 17 persons charged with murder during the fiscal year ended March 31 last.

Nine of these convicted murderers were executed, according to official records, available here. In five cases commutation of sentence to life imprisonment was granted, while new trials were secured in the remaining three instances.

Approximately 750 persons incarcerated in penitentiaries throughout the country for various crimes were released on ticket of leave. Approximately 848 applications for release from prison were refused during the period.

Neuralgia Conquered Its Pain Destroyed

Magical Results Come When You Apply

NERVILINE

It Acts Quickly
Mr. W. T. Greenway, formerly connected with the Guide newspaper and writer, has written: "For twenty years we have used Nerviline in our home, and not for the world would we be without it. As a remedy for all pain, headache, toothache, cramps and disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline." Remember this, wherever there is pain, rub on Nerviline, and you will not prompt results—25c. at all dealers.

Heart Secondary Motive Power

Activity of Cells Calls First Says German Professor

Professor Martin Mendelsohn, who has occupied the chair of diseases of the heart in Berlin university since 1899, has put forward the extraordinary theory that the heart is not the prime motive power for life, but an organ plays only a secondary part. His theory is that the activity of the cells of the body, in absorbing and eliminating fluids, constitutes the chief motive power in forcing the blood through the system.

After 10 Years of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief to one grateful user, and this is but one case among many. Little wonder that it has now become the one remedy for asthma on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

"Bill is going to retire from business for five years."

"Oh, I've heard him say that before."

"Yes, but this time the judge said so."

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle of life and succumb to weakness. This preparation gives promise of health and keeps it.

The merchant who won't advertise till he can advertise big usually never advertises.

Many a man's phenomenal success is a surprise to him.

CHOLERA, CRAMPS, PAINS IN THE STOMACH RELIEVED BY

Mrs. D. Leavitt, Back Bay, N.B., writes: "Last summer my children were very ill with cholera and suffered severely from cramps and pains in their stomachs. I tried several remedies, but nothing seemed to do them any good. A friend of mine told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle and gave them a few doses and they soon found relief. Now I will never be without it in the summer months."

Don't Accept a Substitute
This preparation has been on the market for 30 years, put up only by The T. Millburn Co., Limited, Toronto, Ont.

Nugget White Dressing is a real "sticker." The longest, fastest set can't shake off its snowy whiteness. Whether your shoes be canvas or black, always use "Nugget."

"NUGGET" White Dressing

There's a "Nugget" shade for every shoe made.

Reducing Canada's Debt

Forty-two Millions in Reduction in Last Fiscal Year

Canada's net debt was reduced by \$42,000,000 during the fiscal year ending March 31st, 1927.

When he delivered his budget speech February 17 last, Hon. J. A. Robb, Minister of Finance, could only estimate what the decrease would be, since the Government's financial year has still about six weeks to go. Mr. Robb erred on the side of caution, and placed the figure at \$21,000,000. It was well within the mark. It indicated by the information that he underestimated the amount by eleven million dollars.

It is figured that in the last four years the national debt has been reduced by \$106,000,000.

In November of this year there are maturing loans of \$27,000,000, the maturing dates to redeem one of them in cash and at least a portion of the other, while necessary refinancing will be accomplished at a reduced rate of interest.

Fruit Growing in British Columbia

43,569 Acres New Devoted to This Industry

In British Columbia commercial fruit growing is of comparatively recent origin, but the development of commercial orchardry has been very rapid, especially during the last ten years. The first apple trees were planted about 1850, but not until several years later were numerous trees planted for commercial purposes. The census of 1891 gave the area devoted to all kinds of fruit as 6,500 acres; in 1921 the census showed a total fruit acreage in British Columbia of 43,569 acres. The most noted fruit district in the province is the Okanagan valley, where some of the finest orchards in the province and in the Dominion are to be found. The boxed apples from British Columbia are in demand on all the important markets in the British Isles and Europe. Pears, plums, peaches, apricots, cherries and nut fruit are grown on a large scale throughout British Columbia.

One of the commonest complaints of infants is worms, and the most effective remedy for them is Mother Graves' Worm Expeller.

Feldspar on Lake of the Woods

U.S. Syndicate Opening Crushing and Grinding Plant

An interesting mining development is taking place at the Northwest Angle, Lake of the Woods. A United States Syndicate is opening up a feldspar mine on the U.S. side of the border. This is the first enterprise of the kind in the northwest. The feldspar will be shipped south for treatment at first, but it is the intention of the syndicate to erect a crushing and grinding plant at the mine if the quality of the rock proves satisfactory. A deposit of mica is also to be exploited. A company is also developing a feldspar and mica claim on the Canadian side of the border. If the mine and plant at the mine are for commercial purposes, attention will be given solely to the feldspar.

New Government Land Office

A federal government land office has been opened at Rabbit Lake on the Turfhorst-Hafford line of the Canadian National Railways in Central Saskatchewan, for recording inquiries for homesteads in that part of the Country. Rabbit Lake is north of North Battleford.

No matter how big a man may be, there is at least one woman somewhere in the world who can make him feel small.

Minard's Liniment for insect bites.

Third Rail Stops Engine

By means of a third rail that develops electricity during the movement of the train, a device recently invented by an Italian, stops trains without the action of the engineer. When anything obstructs the track a light shows in the engine cab. If this is ignored a bell rings, and should the ringing escape attention the engine is automatically stopped by the device that applies the brakes. The third rail can also be used for a telephone service for drivers.

A FAMILY MEDICINE

A Welland Lady Tells of the Value of Dr. Williams' Pink Pills in Her Home

"I have many reasons for praising Dr. Williams' Pink Pills," says Mrs. George L. Swick, R.R. No. 2, Welland, Ont. "My first experience with this medicine was in my girlhood, when, following an attack of scarlet fever, I was, left in a badly run down condition, and the pills restored me to good health. Later in my married life I had a severe attack of rheumatism. The pain in my right arm and shoulder was so bad that I could not dress myself without help. Again I resorted to Dr. Williams' Pink Pills, and again they proved a blessing to me, as soon the rheumatic pains and stiffness disappeared and there has been no return of the trouble. Dr. Williams' Pink Pills have also been of great benefit to my children. One of my boys was threatened with St. Vitus dance. His limbs and face would twitch and jerk. I gave him the pills, and again they did not fail, as under the treatment the trouble ceased. I have also given the pills to my little girl, who was anemic, and in this case also with the greatest benefit. Naturally when I hear any one complaining of not feeling well, I recommend Dr. Williams' Pink Pills as I know of no other medicine to equal them in building up the blood and restoring health."

Take Dr. Williams' Pink Pills for anemia, indigestion, constipation, neuralgia and other nervous troubles. Take them as a tonic if you are not in the habit of building up and cultivate a resistance that will keep you well and strong. You can get these pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Air Service to Mining Area

An airship passenger service has been established between Winnipeg and the mineral area east of Lake Winnipeg and north of the Winnipeg river.

RELIABLE!

Discovering Ways and Means Of Making Northern Hinterland An Integral Part Of Canada

Since Confederation the wilderness frontier of Canada has entirely shifted. Then the prairies, which now send a substantial representation to the House of Commons, were known only to Indians, fur traders, missionaries and a few explorers. The first task of the newly formed Canadian government was to arrange for a transcontinental railway to link up the infant settlement in British Columbia; and as a result men as Edward Blake argued earnestly against the folly of wasting money laying a railroad across such permanently uninhabitable areas as the southern prairies of the present provinces of Manitoba, Saskatchewan and Alberta. As late as 1874 Sir William Pitt Rivers wrote a forbidding description of the site of the present city of Prince Albert to prove that Europeans could never live there the year round.

The wealth and habitability of the southern prairies are now common knowledge. Today the push is north. Northern Quebec and Northern Ontario have attracted miners and farmers. Settlers are raising vegetables, grain, cattle and even fruit far north of Hazelton on the Skeena. Away to the north of Edmonton the fertile Peace River Valley is rewarding its pioneers. The push to the north is continent wide, and is on in earnest. We dare not predict what, by the end of the century, will be the population of those great central regions, which have all been proven valuable.

The Arctic and sub-Arctic plains alone remain a challenge to the pioneer. Already, thanks largely to Stefansson, this vast expanse is losing its mythological terrors. Here are one and one-half million square miles of grazing lands, with their native muskox, lichens, ferns and 742 species of flowering plants. Yukon is yielding her gold; but in Alaska the annual catch of fish now far exceeds the products of the mines in value; and Canada's Arctic waters teem with fish.

The reindeer industry in Alaska has proved so profitable that Lomen & Co. alone ship annually 10,000 carcasses that bring a higher price than beef in the cities of the United States. Inspired by Stefansson, by Hudson's Bay Company has been for raising reindeer the southern half of Baffin Island—an area the size of the British Isles. If the project of domesticating the muskox is carried out, a new source of food will be available that will put to profitable use great tracts of our Far North. Oil has been found between Fort Norman and the Arctic Circle.

What else the Far North will give, only time will tell. But the Canadian Polar regions are not as cold as Siberia, which is being voluntarily colonized. And as the climate of the Atlantic Coast once presented terrible difficulties to the French colonists, and yesterday that of the southern prairies seemed an insuperable obstacle to our fathers, so the belief, in which we were brought up, that the Far North was an impossible region of perpetual snow is fading in the light of scientific knowledge that the whole of Canada is habitable and productive. One of the greatest problems of the younger generation is to discover ways and means of making the north an integral part of Canada, instead of the wilderness it has been.

How He Knew

"You are a traveller, sir," said a passenger in a local train, "and perhaps you are familiar with Mud-wish?"

"Yes," said the other passenger, "I call there on every trip."

Glad to hear it, I've never been there. Which hotel would you advise me to stop at?

"The Majestic."

"Do you always stop there?"

"No, I've never stopped there, but I've been to all the others—Bristol Evening News."

Fifty men and women students at the Homeopathic Medical College of New York, have volunteered to be stung by bees and bitten by spiders in an attempt to determine whether the venom can be put to some useful purpose.

W. N. U. 1936

Finishing Lambs for Market

Good Quality Alfalfa the Most Valuable Roughage

The process of finishing lambs for market has been receiving a good deal of attention at the Indian Head, Saskatchewan, Experimental Farm, and accounts of the investigations have been given in the reports of the superintendent. He stresses the fact that in selecting feeder lambs for finishing, good type, growthiness and thriftiness are the primary considerations. It must be remembered that lambs not docked and castrated are subject to heavy discount when marketed. For finishing lambs good quality alfalfa is the most valuable roughage. When it is not available, oat hay from other cultivated grasses can be used to good advantage in conjunction with corn silage and roots. Oats are recognized as the standard grain for sheep, but a little barley may be added. It is generally considered good practice to give the feeder lambs a few weeks on good rape pasture or the run of a grain field after the crop has been removed, previous to putting them on the feed lot for fattening. For fattening, the roughage should be steady in quantity and quality, no more being fed than the lambs will clean up. The grain ration should start at $\frac{1}{2}$ a pound per day and gradually increase to $1\frac{1}{2}$ pounds. The latest report of the superintendent may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Imperial Solidarity

The vast majority of Canadians will be pleased to see Canada and the Motherland ranged side by side, not through unreasoning imperial loyalty, but because it is evident that in such matters the two Governments think along identical lines, deduce similar conclusions, and adopt like courses. That is proof of imperial solidarity stronger than the other unthinking sort.

Cantonese soldiers, looting an American mission, found some interesting looking white chests, which they broke open with rifle butts. The chests were bee hives, and the soldiers left hurriedly.

Excessive rains soaked the wool of a flock of sheep near Sedalia, O., and when the animals burrowed into haystacks timothy seed fell on their backs, germinated and sprouted.

A Frock of Youthful Smartness

The modish use of two materials this season is effectively shown in View A of this charming frock suitable for misses and small women. The pointed yoke, opening at the back, has a V-neck and shaped collar and is joined to the dress employing the contrasting material for the inverted plaits at front and back. The long darts and sleeves are finished with shaped cuffs, and a narrow belt fastens in the front. View B is the same frock and is of one material, with the collar omitted and the edge of the V-neck and short sleeves bound. No. 1543 is in sizes 16, 18 and 20 years. View A, size 18 (35 bust), requires 2 1/2 yards 39-inch material for dress, and 1 1/4 yards contrasting for plaits and trimming. View B, size 18 (35 bust), requires 3 1/2 yards 39-inch material, or 2 1/2 yards 54-inch. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

How Three Western Capitals Are Linked With The Early History Of Our Dominion

Fodder Crops in Saskatchewan

Conclusions Reached at Swift Current Experimental Farm

A deal of information regarding the growing of fodder crops in Saskatchewan is to be found in the report for last year the superintendent, Mr. J. G. Taggart, B.S.A., at Swift Current Experimental station. A few of the conclusions that appear to have been reached, and that are not forth as are follows: That with the exception of corn, annual fodder crops are more dependable when grown on fallow; that few crops equal oats in yield and usefulness; that annual hay crops are more certain to produce hay than grasses and legumes; that in normal seasons early maturing corn out-yields late maturing corn when comparing actual dry weights; that the selection of corn for earliness results in decrease of height in the plant, that it is not economical to harvest and use corn for feed, and that the only way in which it can be profitably used is to pasture it off with live stock such as hogs or sheep; that the thinner plantings of corn generally show a greater development of ear and higher percentage of dry matter, but that when the planting is too thin the total yield of dry matter declines; that where weeds are a serious factor, spring rice, oats or corn and peas are the best of the annual hay crops to grow; that there is no advantage in sowing millet early, but that on the contrary better yields are secured from moderately late seedling; that Grimm alfalfa is the hardiest of the alfalfa varieties as well as the highest yielding.

Saskatchewan Wheat Pool

Officials of the Saskatchewan Wheat Pool announced that at the end of May fifty per cent of the wheat acreage in that province had been signed up for the five year period, ensuring the continuance of the pool until 1922. The wheat pools of Manitoba, Saskatchewan and Alberta have launched a united campaign to obtain renewal contracts.

The Cleveland police never let an offender escape once they get on his trail and have finally rounded up a motorist who has been using his 1906 license plates for the last 21 years.

Spectacles have been prescribed for a near-sighted baboon in the Cincinnati Zoo.

One of the things that link three of our western capitals with three before Confederation is the interesting fact that each of them was at one time an important centre of the fur trade. Winnipeg covers the site of Fort Garry, Edmonton of Fort Edmonton and Victoria of Fort Victoria.

Winnipeg's association with the fur trade in fact goes much further back. The old North West Company and the Hudson's Bay Company both had trading posts at the mouth of the Assiniboine, and as early as 1728 La Verendrye, the famous Canadian explorer, had Fort Rouge built within what is today the capital of Manitoba. Fort Edmonton was an important distributing point for the Hudson's Bay Company for its operations on the upper waters of the Saskatchewan, and north to the Athabasca and the Macleod River country. Similarly Fort Victoria was for years the headquarters of the Company's trade on the Pacific coast, after Fort Vancouver had been abandoned because of the settlement of the 49th parallel as the international boundary.

Things have changed considerably since the days of Fort Garry, Fort Edmonton and Fort Victoria. Those trading posts were occupied by a handful of white traders, with their half-breed housemen and hunters. In days gone by the country that is now the four western provinces; countless herds of buffalo blackened the plains. Today busy modern cities cover the sites of the old trading posts; the great provincial buildings rise majestically from where Indian teepees or camp-fires once stood; thousands of square miles of wheat fields have taken the place of the old grazing grounds of the buffalo; and two transcontinental railway systems follow the river systems that were once the thoroughfare of the fur trader.

It seems almost incredible, as one stands on the busy streets of these flourishing Canadian cities of today, that within the memory of men now living, such as the venerable Western Canadian poet Charles Mair, the only commerce that existed in these places was the trade in peltries, the only means of communication the canoe or horse or ox-cart, and the only government of the famous Company of Adventurers of England trading into Hudson's Bay.

In the year of Confederation, Winnipeg was exactly five years of age; Manitoba had not yet been created out of the old Red River Settlement; to reach Eastern Canada it was necessary either to travel by canoe down the Red River to Lake Winnipeg, up the Winnipeg to the Lake of the Woods, from there by a series of small waterways to Lake Superior, and by the Great Lakes and the Ottawa river to Montreal, or to take an equally roundabout route through American territory. The Canadian Pacific Railway was still a thing of the future. Edmonton was still a trading post in 1887, and much more remote from Montreal than Dawson City is today. Victoria, like Winnipeg, was a baby community, although it had been through the hectic experience of the Cariboo gold rush. It would have been an exceptionally optimistic and far-seeing man who could have stood in any of these places in 1887 and predicted what they would become sixty years afterwards.

Canada's Population

According to the most recent estimate of the Canadian Government Bureau of Statistics, the population of Canada as at June 1, 1926, was 9,389,300. At the census taken in June, 1921, the population of the Dominion was 8,788,323. This latest estimate shows that the Province of Ontario has the largest population in the Dominion with 3,145,600; Quebec next with 2,561,800; Saskatchewan third with 821,000 and the other provinces as follows:—Manitoba, 829,000; Alberta, 607,000; British Columbia, 568,400; Nova Scotia, 540,000; New Brunswick, 407,200; Prince Edward Island, 87,000; Northwest Territories, 8,850; and Yukon Territory, 2,450.

"Haven't I seen your face somewhere?" "Likely—it goes about with me a good deal."

Old-Timers Meet After 40 Years

At the Hotel Vancouver in this city May 22 the Canadian Club gave a photograph they were (1) P. A. Barnhart, conductor of the first train; (2) Peter Richter, driver of the first train; (3) George Munro, roadmaster, the only man now alive who was present at the driving of the first and last spikes in the construction of the Canadian Pacific Railway; (4) Sir

Esme Howard; (5) Jonathan Rogers, a passenger on the first train; (6) T. E. Barnett, first locomotive fireman; (7) W. H. Evans, the engineer who brought the first passenger train in to Port Moody 41 years ago next month; and (8) H. T. Devine, official photographer of the arrival of the first train.

Esme Howard; (5) Jonathan Rogers, a passenger on the first train; (6) T. E. Barnett, first locomotive fireman; (7) W. H. Evans, the engineer who brought the first passenger train in to Port Moody 41 years ago next month; and (8) H. T. Devine, official photographer of the arrival of the first train.

WILSON'S FLY PADS

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Druggists and General Stores—10c and 25c per package.

WORLD HAPPENINGS BRIEFLY TOLD

Perhaps the first woman in Canada to take up aviation, Miss Ellen Vollick, 18, is daily receiving instruction at a Hamilton aerodrome and has applied to Ottawa for a pilot's license.

Captain George H. Wilkins announced before leaving for Seattle that he would shortly return to Alaska to renew his explorations of the Arctic Ocean.

Hon. Mr. Justice Huddell, of the Supreme Court of Ontario, was re-elected president of the Canadian Social Hygiene Council at Toronto for the thirteenth consecutive year.

The Manitoba Cricket Association has decided to send a team to Vancouver next August to compete in the Western Canada cricket tournament. The personnel of the team will be selected after a series of test matches here.

A Ruter dispatch from Odessa says that eleven persons charged with espionage in behalf of Roumania have been sentenced to death by the Soviet authorities. Three others were sentenced to ten years' imprisonment, while two were acquitted.

The United States Court of Appeals has reversed the decision of the United States District Court of Northern Texas which granted Frederick A. Cook, Arctic explorer, a five year probation. Dr. Cook was sentenced to 14 years' imprisonment three years ago for dealing in spurious oil stocks.

Canadian authorities will be required to make the necessary inspection of pasteurization plants, dairies, stables and herds, in order to meet the requirements contained in the Lenroot bill respecting the entry of milk and cream from this country to the United States.

In All Canada

You see it everywhere—the pearly gray enameled ware that spells long service and real, old-fashioned satisfaction. This splendid kitchen ware, SMP Pearl Enameled Ware, defies wear and tear and its surface, like all SMP Enameled Ware, is so china-smooth and clean it harbors no taints or impurities.

You need no steel wool or special cleansers to keep SMP Pearl Ware sparkling clean. Soap and water do the trick in a jiffy. Made in every new handy shape and size by an old established Canadian industry.

Believes in Aviation Future

Exploration Has Succumbed to Modern Methods Says Amundsen

Even exploration, the oldest urge of mankind has succumbed to the expediency of modern methods of travel, and in aviation lies the future discovery of new lands declared Captain Roald Amundsen of polar fame before sailing from Vancouver for Japan.

For this reason Captain Amundsen has abandoned any plans for further exploration and will content himself for the present with retelling of his exploits. His present journey to Japan is for the purpose of delivering a series of lectures in the principal Japanese centres.

"Exploring will all be done from the air in future," declared Captain Amundsen. "I am too old to take up flying and I do not intend to start anything which I cannot carry out myself. My trip on the Norge was a mistake. Commander Nobil was a flier. I am an explorer. We did not see things alike."

"My exploring days are now finished and I prefer to leave while they were at a zenith. I have been following trails since I was 15 and I am content to leave it to the younger generation. My travels from now on into the northern country will be with a gun and a rod," he said. He also stated he was particularly interested in the Northern part of Canada above Athabasca and he hoped to be able to traverse the trails in that part again.

An Attractive New Dress

Exceedingly graceful is the charming frock pictured here. The bodice is joined to the skirt having four flared panels and there are long light-colored sleeves. Contrasting material may be used for the shaped band at the hips and the collar having buttons as an optional adornment. No. 1606 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3½ yards 29-inch, or 2½ yards 34-inch material. View A requires 1½ yard additional 39-inch contrasting material. Price 20 cents the pattern.

The garments illustrated in our new Fashion Book will keep you "in step with fashion." They are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our new patterns. Each pattern envelope gives charts showing at a glance how to lay the pattern on material and where the different pieces are joined. Price of the book 10 cents the copy.

What is a chironomist? Nothing more than a master barber. And a chironomist is y e old time barber shop up to date.

It would be strange if the company a man keeps didn't know him.

Miss Hortense Cartier, only surviving daughter of Sir George Etienne Cartier, one of the Fathers of Confederation, who came to Canada a few days ago as the guest of the White Star Line to attend the ceremonies in Canada in connection with the jubilee of Confederation.

Honors Canadian Soldiers

Mons Pays Tribute to Men Who Brought Relief to City

Heartfelt recognition of what the Canadian soldiers had done in capturing the city of Mons, where the final shot in the war was fired and the city restored to its freedom after 50 months of German occupation, was given by Burgomaster Maltriaux, of Mons, at the unveiling of the plaque in commemoration of the heroic entry of the Canadian corps into the city.

The Burgomaster replied on behalf of the city to the eloquent address of Hon. Rodolphe Lemieux, speaker of the Canadian House of Commons, and to tributes paid by other taking part in the ceremony.

Burgomaster Maltriaux paid glowing praise to the heroism of the Canadians and spoke of the deep gratitude of the people of Mons for the relief they had brought to the city. As a special mark of recognition, the Burgomaster announced that the following had been made honorary citizens of Mons:

General Sir Henry E. Horne, Commander of the First Army in whose territory the Canadians operated; Lieut.-General Sir Arthur Currie, commander of the Canadian corps; Major-General F. O. W. Loomie, in command of the third Canadian Division, and Brig.-General J. A. Clark, who was in command of the seventh Canadian Brigade, whose troops were the first to enter Mons. The latter had also been made a member of the Mons Bar, the Burgomaster said.

For Burns and Scalds. — Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will subside and in a short time cease altogether.

Making Concrete Lighter

"Gassik" concrete to give it added lightness is a novel idea reported from Sweden. While the concrete, a mixture of sand, gravel, and cement, is still soft, gas is introduced into the mixture. This has the same effect on the concrete as yeast has on bread, filling it with small holes. The concrete produced is just as strong as the ordinary product, but much lighter.

RAMSAY MACDONALD "HOME AGAIN"

Picture shows Mr. Ramsay MacDonald, Britain's Labor leader, and his daughter Isabel, being welcomed by the Mayor of Southampton on the arrival at that port of the Cunard liner "Berenberg." In the group are also Arthur Henderson and F. O. Roberts.

SUNDAY SCHOOL LESSON

JUNE 26

LIFE AND LETTERS OF PETER

Golden Text, "Come ye after me, and I will make you fishers of men."—Matthew 4:19.
Reading: 1 Peter 5:1-11.
Devotional Reading: Isaiah 55:6-13.

A Review by Means of Allusions

Ascertain how many recognize each allusion as you read it. After a number of the class has explained the reference, ask a few questions about the lesson in which it occurs.

Self is the only person that can ever blind the soul.

Love is the only angel which can build the gates unroll.

And when he comes to call thee, arise and follow.

His way may lead through darkness, but it brings to light at last.

—Henry van Dyke.

And the voice which came from heaven we heard when we were with him on the holy mount.—Peter.

On the spire of the bellry tilted with a spring sun.

Glanced like the tongues of fire held by Apostles aloft.—Longfellow.

And Cardinal-Deacon, have not now to learn.

That ev'n St. Peter in his time of fervor, like his master, ay, and thrice, one Lord.—Tennyson.

I gave up all to follow thee.—Even like him who gave up his nets To winds and waves of Galilee!

—Thomas Hally Aldrich.

Let all dear hearts with me rejoice, as did the saints of old.

When the Lord's good angel rescued Peter told.—Whittier.

We shall be sifted till the strength of self-reliance be changed at length To weakness and long-fellow.

A photographer makes a sensitive plate, exposes to light by rays of light that he chooses, dips it into the proper solution, and holds it up to the light to see if his picture is there.

What else did this great Teacher do on that day but hold up three souls to the light to find out if the reflection of the Son of God were fastened there.—Stiller.

"In warning Germany I found professors spreading the idea that Germany is the rock selected by the Almighty God upon which to build His empire."

Your accent, like St. Peter's would betray you.

Did not your yellow beard and blue eyes.—Longfellow.

We are inclined to obey man rather than God, to think more about what others will say than about how God will judge.

"You see the church can no longer say, 'Peter, silver and gold have I none,'" boasted Innocent the Fourth to Thomas Aquinas, and that great philosopher remarked in his turn, "Nor can she say, 'Rise up and walk.'"

Thou who hast thyself Endured this fleshhood, knowing how as a sinner

And sinking venture it can drag us down.

And down us in the melancholy deep Sustain me that I walk these waves Restless!—Mrs. Browning.

And in the hereafter, angels may Roll the stone from the grave away!

—Whittier.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long as simple a remedy as Holloway's Corn Remover is available.

"I was shocked to hear that Peter eloped with your wife, I always thought he was your best friend."

"He is, but he doesn't know it!"—Toronto Gossip.

Experiments of more than 30 years have proven that Aluminum is the best container for tea, and paper the poorest. Red Rose Tea is now packed only in Aluminum, and every package is guaranteed to be in perfect condition. b 1

Life of Early Canadian Settlers

Primitive Life of First Settlers in Upper Canada

In this jubilee year one may contrast the lot of the immigrant today with his predecessors in old Canada. After the U. E. Loyalists, who had their towns troubles, the earliest settlers had a long voyage across the Atlantic in a sailing vessel, and travelled thence to their destination by the inland waterways or by stage. As they struck out into the wilderness every road was far and far between. Schools, churches and doctors were non-existent or difficult of access. A good picture of early settlement in Upper Canada is given by the historian McMullen. He describes the settler going into the woods with no more worldly possessions than a gun, an axe and the clothes on his back.

"Thus lightly equipped, he took possession of his two hundred acres of closely-timbered forest land and commenced operations. The walking rings again with the vigorous strokes as huge tree after tree is assailed and tumbled to earth; and the sun presently shines in upon the little clearing. The best of the logs are partially squared and serve to build a shanty; the remainder are given to the flames. Now the rich mold, the accumulation of centuries of decayed vegetation, is gathered into little hillocks, into which potatoes are drilled. Indian corn is planted in another direction, and perhaps a little wheat. If married, the lonely couple struggle on in their forest oasis like the solitary traveller over the sands of Sahara or the wanderer over the Atlantic. The nearest neighbor lives miles off, and when sickness comes they have to travel far through the forest to claim human sympathy. But fortunately our nature, with elastic temperament, adapts itself to circumstances. By and by the potatoes peep up, and the corn-blades modestly show themselves around the charred maple stumps and girdled pines, and the prospect of the sufficiency of food gives consolation. As the winter approaches, a deer now and then adds to the comforts of the solitary people. Such were the mass of the first settlers in Upper Canada."—London Adventurer.

For Forest Bites and Chibblains. — Chibblains come from undue exposure to lush and cold and frost-bite from the winter winds. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it attracts the inflammation, and relieves the pain. The action of the oil is prompt and its application is extremely simple.

New Type of Airplane

Invention of French Postman Operated by Compressed Air Motor

A French postman named Ernest Dole, of Leaulpille, a little town near Avignon, France, who claims to have invented a new form of flying machine to be operated by a compressed air motor and six high-pressure air tubes which would permit instant elevation, placed a model of his invention on exhibition at the town there. Jurisprudence to the motor appears a novel turbine apparatus which takes in air to replace the air supply which the motor consumes, thereby dispensing with any need of fuel power.

The plane resembles the Santos Dumont model in form. The model shows two transmission pulleys and two propellers, one located over the bow of the machine and the other below midship.

Aside from the compressed air motor which is the most important feature of this invention, the postman's aeroplane distinguishes itself from other flying machines in being able to achieve vertical elevation, and the safety of the pilot is secured through transformation of the wings into parachutes. The inventor of the machine hopes to give it a trial soon at the airdrome in Lyons.

Misfortune often puts us wise to our own carelessness.

To Give You Service

The U. G. G. Elevator at your station is there to give you service, both in handling your grain and in furnishing farm supplies.

These farmer-owned elevators mean better returns for you in price and grade. The U. G. G. elevators set a standard which other companies have to meet.

U. G. G. elevators are there for the use and benefit of all farmers alike. Shareholders in the Company and farmers who are not shareholders all get the same service and treatment.

We don't claim to be perfect, but we do claim—and we believe justly—that the service given by U. G. G. elevators and by all departments of the business brings real financial benefit to farmers.

If you agree that this is a fair claim, we shall appreciate your business at your nearest U. G. G. Elevator.

UNITED GRAIN GROWERS LTD

Leave your provisional order for this year's Binder Twine at the Elevator.

Others in That Class, Too.

The editor of a country paper recently reported that he had received a news item from one of his many painstaking correspondents. The item read to the effect that a bride in the neighborhood had excited considerable comment among neighbors by kneading bread with her gloves on.

The editor, seizing upon the opportunity presented, used the item in his paper, adding as an appendix. "The editor of this paper needs bread with his shoes on, but if some delinquent subscriber don't pay up pretty soon, he will need bread without a darn thing on."

"THE GREATEST FORWARD STEP

IN THREE THOUSAND YEARS"

The Wheat Pool

H. W. Wood, Chairman of the Board of Directors of the Alberta Wheat Pool, says that in forming this marketing organization the farmers took the greatest step forward in three thousand years.

The Wheat Pool enables wheat producers to handle their wheat in their own way and sell it themselves in their own way. The entire force of this great organization is directed towards the desired end of bettering the conditions of the western grain grower.

Every grain grower who joins the Pool now adds that much strength to the Organization. The stronger the Wheat Pool is, the better for Western Canada.

THE SECOND SERIES OF WHEAT POOL CON-
TRACTS ARE NOW READY.

"Sign for Safety"

So Much for So Little.

Each week there is compiled news of all the various local activities, of this—your—district. The new arrival in a neighbor's home is announced with gladness and perchance, a departure to the great beyond must also be chronicled. Church services, public meetings, social events, the doings of yourself and your neighbors, are all written down.

These items are collected

by the publisher, who with his type and press, produces a local weekly newspaper for you to read.

For this service we ask from each individual a very moderate sum.

No person is so poor as to not afford it—no person is so well informed that they can do without it.

Credit at the Store

The finest thing a man can have is credit at the store;
It is a balm and a salve for every mortal sore.

The customer who pays his debts when due has shining fame. "He is the best of all good things," the merchants all exclaim. And when misfortune dogs his heels, as it will visit men, And he is shy of plunks and wheels of kopecks, dough and yen, The merchants say, "Buy what you will and we will gladly wait. Till you are fixed to pay the bill, we know that you are straight." The man who doesn't promptly pay the merchants who owe

On the appointed day, all kinds of sorrow know.

The Guide to Safe Tire Service

"Firestone Tire Specialist"

Only by specializing in Firestone Tires are we able to give the high type of service that insures most miles per dollar from your tires. Call in to-day and we will gladly see that your alignment and pressure is correct.

Hyett & Schmidt, Agents, Stony Plain.

STEPS TO AVERT AT OUTBREAK OF WAR IN EUROPE

Geneva, Switzerland. — Statesmen attending the League of Nations council meeting here are reported to be increasingly convinced that the time has imperatively arrived to take preventive steps to avert an outbreak of war in Europe.

Fear of such an eventuality is mainly inspired by the reported attitude of Soviet Russia following the breaking of diplomatic relations by Great Britain and the assassination of the Soviet Minister to Poland. In South Europe another situation presents itself through the break of relations between Jugoslavia and Albania.

The Associated Press learns that Germany has been virtually brought over to the camp of those powers who favor war, by the reported attitude of Soviet Russia following the breaking of diplomatic relations by Great Britain and the assassination of the Soviet Minister to Poland.

If this warning is delivered jointly by the powers which is a possibility. It will not be worded as a menace to the Soviet system, but will be drafted from the viewpoint that Europe cannot risk another war and that the powers are united in the sense that any aggressor is the enemy of all.

Foreign Minister Stresemann of Germany is profoundly anxious to avoid any appearance of "forging a hostile ring of steel around Russia" and will presumably only promise Germany's support to a general anti-war movement.

Germany has a special national interest in preventing any armed outbreak between the European powers and Russia as she subscribed to the principle to the Locarno pact on the understanding that German soil would not be utilized for the passage of troops moving against Russia, but as a member of the League of Nations she would find herself greatly embarrassed in preventing the operation of military penalties against any state which refused arbitration and resorted to hostilities.

Will Hear Canadian Appeals

Six Cases Will Come Before Session of Privy Council

London. — Six Canadian appeals are on the list for the June sitting of the judicial committee of the privy council.

Among them is one of the Lascar Collieries, Ltd., Alberta, an appeal in which the minister of justice and Attorney-General of Canada are litigating with others as respondent touching the jurisdiction of the board of railway commissioners for Canada over provincial railways.

There is also a reference by the Lieutenant-Governor of Nova Scotia, Hon. James Crockett, Tory, on questions affecting the constitution of the Nova Scotia legislative council. In this appeal the Nova Scotia government seeks authority either to increase the membership of the legislative council beyond the present statutory number of 21, or to dismiss the members of that body at pleasure, the government's aim being to abolish the council in either case.

Would Take Canadian Butter

Good Market in Britain for Saskatchewan Product

Regina. — That Saskatchewan may shortly be exporting a regular seasonal quantity of butter to the British market, was stated by E. T. Jupp, dairy products manager in London, England, for the New Zealand and Mercantile Agency Co., Ltd., during his visit here. Saskatchewan creameries have first-rate manufacturing plants and organizations, and, favored by legislation of six encouraging kind, should be able to ship much butter to the old land, Mr. Jupp declared. It was necessary, however, that the requirements of the British market be carefully studied.

St. Catherine, Ont. — Rev. Dr. Johnston and Dr. W. J. Macdonald left on a trip which will take them to the far reaches of the Silver River and its connections to the Arctic Ocean. They will deliver 300 miles from Edmonton and will travel more than 1,400 miles by water.

W. N. U. 1686

Home Makers Discuss Immigration Question

Resolution Disapproving Government Relief Brought Before Conven-

Saskatoon. — Disapproval of the vigorous immigration policy of the government until the present unemployed are cared for and until those already brought to Canada in former years have been assimilated and stabilized, and opposition to the granting of special privileges to those outside Canada that are not granted to fellow citizens here, was the substance of a resolution endorsed by the United Farmers and presented by the Robart Home Makers for discussion by the Home Makers clubs in annual session at Convocation Hall.

This resolution with the request for discussion was read by Miss De Lury in her annual report as convener of the immigration committee. Much interest has been aroused on the subject in many of the clubs and the practical working out of the immigration policies in the province has stimulated this interest to such an extent that a regularly organized committee of immigration be formed on the same basis as other standing committees with a provincial convener.

Honor Three Western Doctors

Receive Life Membership in Canadian Public Health Association

Regina. — Saskatchewan and former Saskatchewan doctors were honored by the Canadian Public Health Association at Toronto. Dr. M. M. Seymour, deputy minister of health for Saskatchewan had a life membership in the Association conferred in him at the annual meeting.

The following were added to the representatives of the Western provinces on the council: Dr. R. M. Bow, Alberta, and Dr. F. McGill, Saskatchewan.

George D. Porter, Toronto, was re-elected president of the Association for his third term and Dr. E. T. Turnbull, Vancouver, was elected one of the vice-presidents.

Attack Oath of Allegiance

Objection Raised by Republicans of Irish Free State

Dublin. Irish Free State. — The oath of allegiance to which the Republicans have strenuously objected is: "I do solemnly swear, true faith and allegiance to the constitution of the Irish Free State, as by law established, and that I will be faithful to His Majesty, King George V., his heirs and successors by law in virtue of the common citizenship of Ireland with Great Britain and her adherence to and membership of the group of nations forming the British Commonwealth of Nations."

Urging Arbitration

Geneva, Switzerland. — Acceptance of obligatory arbitration by all governments was recommended by the International Council of Women, which urged the League of Nations to frame a general conciliation treaty, open to all states. The council also adopted a resolution that the next assembly of the league declare a year of aggression on international crime and adopt a treaty for the prohibition of aggressive war.

Flying to East Indies

Amsterdam, Netherlands. — Van Leer Black, chairman of the board of directors of the Baltimore Sun departed from the Schiphol aerodrome as a passenger in a plane he chartered for a flight to the East Indies. Before taking off he declared it was not a stunt trip and no record would be attempted. Mr. Black is accompanied by two pilots and his valet who has already flown with him some thousands of miles.

Orders Rent Reduction

Rome, Italy. — The cabinet has approved a decree of law forbidding increases in the present rent rates both of habitations and shops and fixing the maximum rates at four times that of 1914. The decree also ordered a fifteen per cent. reduction in the rent of apartments of less than six rooms, of ten per cent. for apartments less than nine rooms, but more than six, and reductions of from twenty per cent. for shops.

Miss Agnes MacPhail, M.P.

Miss MacPhail, who is proving to be one of the most capable members of the Canadian Parliament, will attend and address the Progressive Rally at the Regina Stadium on July 8th.

Penal Servitude for Life

Assassin of Soviet Minister to Warsaw Escapes Death Penalty

Warsaw. — Boris Kowceda, the 19-year-old youth, who assassinated Peter Volkoff, Soviet minister at Warsaw, on June 7, was sentenced to penal servitude for life and the loss of all civil rights. The courts decided to recommend to the President of the Republic commutation of the sentence to 15 years servitude.

Kowceda admitted the killing at his brief trial, but declared he was not guilty of murder. He had merely taken vengeance for "what the Polish viets have done in Russia."

FINAL RESULTS OF ELECTIONS FOR IRISH COMMONS

Dublin. — With the three independent to be elected by Dublin University, the final state of the parties in the new Dail Eireann will be as follows:

Government, including the "Speaker" automatically elected, 47.
Fianna Fail de Valera's party, 44.
Labor, 22.
Independents, 15.
Farmers, 11.
National League, 8.
Sinn Fein, 5.
Independent Republican, 1.
Total, 153.

The Clan Eireann, one of the numerous Eire State political parties, has been extinguished by the general elections, and its founder, Prof. W. B. Yeats, has lost his seat in the Dail. He represented the National University in Dublin and his only supporter in the last Dail, Patrick O'Malley, deputy speaker, was defeated in Galway.

Canada's Newest Locomotive

The illustration depicts the new "6100" class locomotive, the latest production of the mechanical department of the Canadian National Railways. Forty of these "Northern Type" engines have been manufactured in Canadian plants for use of main line fast passenger and manifest freight service. They are 93 feet 10 1/2 inches over all. The tender has a capacity of 11,300 imperial gallons of water and 20 tons of coal. In working order, the total weight of engine and tender is 635,000 pounds. Note the new position of the whistle, located on the left hand of the smoke box near the stack. This is to save the driver's eyes. These engines are designed for power at speed and it is estimated that they can make 30 miles an hour with a heavy train.

Post-Graduate Course For Canadian Students

Plan Sought to Have British Examiners Come to Dominion

Toronto. — In order to control the influx of graduates of Canadian medical colleges to the United States, where many of them go to post-graduate work, the Canadian Medical Council has under discussion and arrangement a scheme for the co-ordination of British and Canadian medical education.

At present, cost of going to Britain to take post-graduate work places it beyond the reach of most eligibles. Under the plan which is expected to be in operation within a year, the graduate of a Canadian medical college will be able to take in Canada his primary examination for admission to the fellowship of the Royal College of Surgeons in England. British examiners will come out and set the examinations.

The primary examinations in physiology and anatomy will be conducted here, but the final examination in clinical subjects will still have to be taken in England. This is expected to result in large numbers of Canadian graduates taking up work here at home for the British examination.

Another activity in which the Canadian medical association is entering upon is the establishment in pioneer districts with the assistance of the Canadian Red Cross pioneer hospitals where the best medical services will be available to people in the hinterlands of Canada as modern and up to date as if they were in a city.

Cattle From Britain

First Shipment to Arrive After Embargo Restrictions Removed

Ottawa. — The first shipments of cattle and sheep to reach Canada from Great Britain since the embargo restrictions have been removed are now in the Dominion quarantine station at Levis, Que. The federal authorities were notified recently. As a number of other permits have been issued further shipments are expected to arrive shortly.

Cattle will be kept in strict quarantine for 30 days after arrival, while the quarantine period for sheep is 30 days from the time of embarkation, and in order to prevent any possibility of the dissemination of infection should it be present in any of these imported animals, importers or other stockmen will not be permitted to enter the quarantine premises even for the purpose of looking their stock over.

Proposed Memorial

Kington. Ont. — General A. E. Ross, M.P. for Kington, has sent a circular to Conservative members in the country asking for subscriptions for the erection of a memorial to Sir John A. Macdonald in Ottawa, and with the balance to build a home for the Conservative leader in the capital.

Rough Rider From Australia. — Sydney, Australia. — Allan McPhee, Australian champion rough rider, goes to Canada to contest the world's championship at the Calgary steeple in July.

SEEK INCREASE OF TARIFF ON CLOTH IMPORTS

Ottawa. — Imported shirts were torn between the fingers and imported blankets were pulled easily into places before the tariff board by P. Campbell, manufacturer of flannels, Almonte, Ont., to show the nature of importations.

Mr. Campbell, in seeking an increase in tariff, said that to have standards established which would make it impossible to sell inferior fabrics for work shirts and flannels. Mr. Campbell produced imported shirts which had lost their color after a single washing and Canadian-made shirts still firm with fast colors after two years of wear and wash by a farmer.

The Merchant Tailor Association brief objected to any increase in tariff on imported British wools. It was claimed the British materials were superior in uniformity and finish, and that the pattern selection was greater than the Canadian.

H. P. Sparks presented the case for the Canadian Garment Manufacturers, not requesting any specific change of duty but suggesting a spread of ten per cent. as a minimum between the raw material and the finished product. The hearing will continue.

Narrow Escape of Portuguese Aviators

Rescued by Fishing Boat When Plane Wrecked at Sea

Rio Janeiro, Brazil. — A three hours' battle with the elements as they held on to the floating wreckage of their plane is the story of Major Sarmen-to Belres, Portuguese aviator, and the three men who were with him in his attempt to fly back to Lisbon by way of the United States. They left Para. Brazil, for Georgetown, British Guiana, on June 7, and after flying only 30 miles, a mishap compelled a forced landing at sea. When about to resume the journey a huge wave engulfed the plane, wrecking it.

The men held on tenaciously for three hours as a storm raged, great waves washing over them repeatedly.

When they had almost given up hope a fishing boat appeared and they were rescued with difficulty and taken to Para. The plane sank and only the log of the flight was saved.

Major Belres, who flew across the South Atlantic from the West African coast to an island off the Brazilian coast and thence to Brazil last March, now will return to Europe with his companions by steamer.

Developing Proper Spirit

Canadians Should Think of Canada All the Time

Ottawa. — "Until we develop a spirit of national consciousness Canada will never become a great country," was the statement of Howard Stutchbury, trade commissioner of Alberta, speaking here. "The people of the United States always think in terms of the United States. Over there they don't have 'made-in-the-Empire' exhibitions—they don't have to, for the tendency to consume native products is inherent. That spirit should be encouraged in Canada, and until Canadians think of Canada all the time, Canada cannot become a great nation."

Agree on Tomato Prices

Kelowna, B.C. — Tomato growers have reached a satisfactory agreement with the canneries. The price to be paid to the growers will be \$16.50 per ton for Earliana, which variety will be grown at Kelowna, and \$18.50 for John Bar, which will form the main crop in some of the southern plantings. It is expected 1,000 acres will be planted to tomatoes in the Kelowna district.

Mrs. Churchill Injured

London. — Mrs. Spencer Churchill, wife of Winston Churchill, British Chancellor of the Exchequer, was injured in a motor accident in the Kensington district of London. She received a number of bruises and suffered from shock, but was progressing satisfactorily.

Wheat Pool News Notes.

Commencing Monday, June 20, the Alberta Wheat Pool will undertake an intensive drive for the signing up of the Second Series of contracts.

Supt. J. Bennett, of the Prince Rupert Wheat Pool elevator, was in Calgary and stated that twenty shiploads of grain or six million bu. would be the season's handling from that terminal. The last boat, the Yonci Maru, is now loading 300,000 bushels of wheat for Shanghai.

The first British Columbia wheat pool local to be formed was organized at Brilesville, B. C., by W. J. Jackman, director of the Alberta pool. British Columbia wheat farmers are greatly interested in the pool.

The terminal elevator site purchased by the Alberta wheat pool in Vancouver harbor is one of the best location for an elevator to be found there.

Considerable progress has been made in the 1927 elevator program of the Alberta wheat pool. As a result on negotiations with elevator companies, forty-one elevators have been bought this year. In addition, 37 have been contracted for where there are no existing facilities, or where it is apparent the present owners have decided definitely not to dispose of their properties to the Pool.

The Floral Assets of the C.P.R.

Upper—Garden and fountain at Kneass Station.
Lower—Woodstock Station grounds.

Flowers are among the assets of the Canadian Pacific Railway. It is the policy of the Company to establish permanent flower gardens at every station along the long line of track stretched across the continent.

In the very early days of the railroad the pioneers were too busy attending to the task of opening up new roads to give much attention to flowers, yet even back in the early days one of the C. P. R. employees produced a few varieties of flower seeds in his own plot and distributed them amongst his friends at some of the stations with the object of starting flower gardens along the line. This took place over 30 years ago, and to-day the Company spends a considerable amount producing and distributing seeds and shrubs of all kinds to station agents along the line. The Company maintains a floral department with headquarters at the Windsor Street Station in Montreal.

In carrying out this work a great number of trees, seeds and perennial plants are used annually. Suitable trees such as ash, elm and maple, are supplied, and shrubbery such as honeysuckle, lilac, barberry, elder, spiraea, weigela and many other varieties together with a long list of bed flowers. Vines are also supplied to cover buildings and fences surrounding stations. For this purpose Virginia creepers and Japanese ivy are considered best.

During the past thirty years the encouraging influence of the C. P. R. gardens has materially assisted in the inauguration of floral societies all over the country, many of the officials of the Company being members of these societies. It is pleasing to remember that the work in connection with the gardens is credited directly to the agents and employees of the station, for it is carried out mostly in their own time, through their enthusiasm in beautifying the stations of which they are in charge. The C. P. R. recognizes this effort and much interest is aroused by the annual competitions on both eastern and western lines of the Company for the finest station gardens. Extensive layouts do not enter into the contest but the gardens that have shown the most improvement during the year are the ones that carry off the honors. Representatives from the floral department tour the lines each year, sizing up the gardens and deciding the winner. Substantial money prizes are awarded each year.

The floral department of the Canadian Pacific is constantly in touch with horticultural institutions, including agricultural colleges and societies, so that no stone is left unturned to keep up to the very latest standard.

CHAPTER II.—Continued

"Get along with you, Anna," said Maggie soothingly; "you're crazy. Be thankful you have a roof over your head and good money coming every month; and I'd advise you to stow all that wild talk or you'll get canned."

"Sure, that's a threat—shut your mouth or lose your job. We slaves, every one of us. And you're one, too, but you love your chains."

"Well, slave or no slave, will you meet the girl at the station?"

"No," said Anna, "I only recognize the claims of the Union. This girl is a scab so far as I am concerned. Your religious stir doesn't go with me—it's nothing but a racket. All this is war, Maggie, you might as well name it, it's war. Now go, and tell on me if you want to."

Maggie Kenny, looking after the head waitress as she swept from the room, shook her head. "That's the devil's own talk," she said, "and there's no sense in it. Well, she needn't go to the train; I can get Mrs. Spencer herself to give me a hand with the dinner, and it's herself that can do it well, and it's a grand woman she may be, but it's a grand woman she is, anyway."

Mrs. Spencer, when appealed to by her old friend and cook, readily agreed to cook the dinner. She had planned to go to a tea at the Rectory to raise money for the Chinese, but she would send her dollar instead; and, indeed, she confided to Maggie it was grand to get her hands into the pie crust again, and maybe it was just as good to do a kind turn for a Finn girl coming into the country as for a Chinese, across the sea. The problem of the new Finn girl did not bother her at all. "Any girl that will wash dishes and scrub floors can at ways find a place, and if she's civil and clean and honest she'll get on, and," added Mrs. Spencer, "we can do with another now the Spring is here and we'll be for turning out the bedrooms."

When Margaret Kenny got off the Broadway car opposite the station a

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help.

Chatham, Ontario.—"I want to tell you how much your medicine has done me. Before my baby came I felt so weak and run-down that I could hardly do my work. My head ached continually and I was so discouraged that I could not get up in the morning. I had another baby a year and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound as I had read so much about it in the little books. I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she said it might set me back if I started to do it again. I sure did get me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old, and I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe they need help at those times." Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario.

W. N. D. 1686

ently with shoe polish. A stern to-boggan-side of a hat, stiff and unrelenting, sat on Maggie's head like a helmet, of no use, and the frown look which even the smallest, kodak could inspire, was in her eyes.

"Say, kid, you're smart!" cried Maggie in admiration. "I wouldn't know that myself."

Hotel laughter, showing a row of shining white teeth, she knew she was being praised.

She touched the photo and then pointed to Maggie's eyes.

"You'll do," said Maggie approvingly. "Kate Kenny didn't hand in a lemon this time."

The head waitress of the Yale Hotel was absent; lawfully detained, too, indeed, at that moment that the delicious odor of roast beef, gravy, fried onions and creamed cauliflower was floating into the dining-room from the kitchen table, where Mrs. Spencer, in a bungalow apron, carved and "dished" at that very moment Miss Anna Milander was looking in a cell at the central police station, charged with having maliciously and with intent to hurt, hurled a stone at a policeman. Anna did not mind the charge; she was well pleased with her afternoon's work. She had struck a blow in Freedom's cause. It was all rather vague in Anna's mind. She was rather favorably disposed toward policemen as a class, but having joined the Union she was determined to become "class conscious." Policemen were enemies; so were employers; every one was an enemy except members of the Union. So Anna, having a clear program in her head, sat on her narrow bed in a women's cell, waiting. Her picture would be in the paper; she would be praised by the speakers. She had risen from the dull, gray, dusty depths of obscurity, which the speaker called the base of the economic pyramid, and in the twinkling of her eyes she was in the submerged strata had covered an honest rock. More than that, it had gone unerringly to the mark, and the pride of achievement burned in Anna's heart. In the fulgure of her contentment she sang:

"The banker, calls it interest, and thinks the other eye.
The merchant calls it profit, and heaves a joyful sigh;
The landlord calls it 'rentals,' and he puts it in his bag;
The good old honest burglar—he just calls it 'swag.'"

Though not related, Helmi and Anna bore the same name, and resembled each other in features and coloring—the same creamy skin, reddish hair, brown eyes and general type. But at the moment they were widely different in appearance owing to the different state of dress. Helmi wore a coarse shirt, a print blouse, with leather belt, heavily soiled boots and home knitted stockings. Anna, having been two years in Canada, had already acquired "razz." She wore a narrow skirt, slit at the side, showing a flare of crimson petticoat, with a knife pleated edge; a belted coat, red Windsor tie, and silk stockings always. The thought of having worn cotton stockings when she arrived in Canada gave her a smothered feeling now—they were the brand of servitude. "Bandages," she scornfully called them.

(To Be Continued.)

What Russia Owes Private British Investors: have claims against the Russian Soviet Government amounting to 2,510,000,000, and Russia's war debt to Britain is about £75,000,000. It was one of \$6,000,000,000 altogether. Russian indebtedness to France is quite as great. Russians appear to be past masters in the art of the golden touch.

There are 2,130,000 licensed radio listeners in England; 1,337,122 in Germany; 233,000 in Sweden and 114,492 in Denmark.

Record of War Service: The devotion of the Prussian "steel helmets" to the Hohenzollerns is really very hard to understand. The family's record of war services is a very poor one. The Kaiser ran away. The Crown Prince earned the reputation of a gay Lothario. Kiliel stole furniture from the country houses of private citizens. — London Sunday Pictorial.

In the little town of Lyme Court, N.H., with a population of 900, two in every hundred are over 80 years of age. Thirty residents are between 70 and 80.

Among those who didn't see the big police parade was the man who robbed a store while it was taking place.

Minard's Liniment is reliable.

Says Prison Reformers Carried to Extreme

Jails as Comfortable as Hotels Says Chief of Detectives in Quebec

Aspirant chief of police of Canada and the United States no longer fear prison terms, George S. Riaux, chief of detectives in Quebec, rapped "mollycoddling" of criminals in a paper read at the convention of police chiefs in Montreal.

Riaux went on to say that prison reforms had been carried to a ridiculous extreme, and that many prisons now contain comforts not to be found in homes.

"The crook gets a better 'break' than victims of his violence," the Quebec chief detective said. "He is let loose on society after his sentence is completed, and the worst that happens to him when he outrages society again is that he is returned to a place that is as comfortable as a hotel."

Saying that records prove that 70 per cent. of the criminals who have been confined three times or more go back to their crooked devices when they are freed, Detective Riaux declared that no amount of sentimentalism or "sob stuff" is going to save the misfits of the world.

Refuses to Pay Fees

Reason Elevation of Lord Byng Has Not Been Gazetted

The viscountcy conferred on Lord Byng in October last on his retirement from the governorship of Canada, has not yet been gazetted and the delay is believed to be due to the high cost of fees for gazetzing a peerage or elevation therein, which Lord Byng refuses to pay. This runs anything between £200 and £250, according to the grade. Lord Byng is following the example of other soldiers who received honors in recognition of their war services in declining to pay for his elevation.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with griping pains, is seized with cold or fever, refuses food or vomits, what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a single medicine in the house. The puzzle is what to give him to get him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly and forever break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves, promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

First Electric Street Car

First Electric Car in the World Operated at St. Catharines, Ont.—George E. Patterson, builder of the first electric car operated in the world, died, recently, in Pasadena, Calif. In 1874 he established a carriage building business at St. Catharines, Ont., and later constructed street cars, the first being known as Patterson's "Electric Car." It was one of his street cars, converted into an electric car, that was operated in 1887 between St. Catharines and Thorold. Five years ago he retired from active business at the age of 83.

Record of War Service

The devotion of the Prussian "steel helmets" to the Hohenzollerns is really very hard to understand. The family's record of war services is a very poor one. The Kaiser ran away. The Crown Prince earned the reputation of a gay Lothario. Kiliel stole furniture from the country houses of private citizens. — London Sunday Pictorial.

In the little town of Lyme Court, N.H., with a population of 900, two in every hundred are over 80 years of age. Thirty residents are between 70 and 80.

Little Helps For This Week

Vouchsafe, O Lord, to keep us this day without sin.—To Deum.

Dear Lord, Thou bringest back the morn.

Thy children wake; Thy children pray;

Oh! make our souls divinely yearn.

How Thy best beauty on the day

Lead our slow feet that speed of

Thine;

Our busy hands from evil stay;

Lord, help us still to tasks divine.

Still keep us in the heavenly way.

The weeklings plead; the sinners

pray;

But, Lord, Thy grace exceeds our

sin;

We cannot ask too bright a day;

Too much of Thine we cannot win.

—Thomas Hornblower Gill.

Let it be our happiness this day

to add to the happiness of those around

us, to comfort some sorrow, to relieve

some want, to add some strength to

our neighbor's virtue.

—William Ellery Channing.

Ease asburn with Minard's Liniment.

Lived 30,000,000 Years Ago

One of the world's largest dinosaurs (Tornaria), which died about 30,000,000 years ago, is to be put on its legs again at the Natural History Museum, South Kensington.

The Tornaria lived in the estuaries of rivers, laid eggs, and ate floating vegetation. It was about fifty feet long and thirty feet high, and weighed something like ten tons. Its bones were found in Tanganyika.

Eczema Covered Entire Body Cured by Heals

"As far back as I can remember I had eczema. Practically my entire body was covered with it. It broke out in a fine rash which as I grew older developed into pimples and blisters. As a child I used to scratch it until it would bleed, and the burning and smarting were terrible. My face was a sight and I was kept home from school. I was kept awake at night and the torture was terrible. I sent for a few samples of Cuticura Soap and Ointment and after using it I got relief. I purchased more and in three months I was completely healed." (Signed) Miss Helen E. Hunter, R. R. 3, Brockville, Ont.

Get your skin clear by using Cuticura Soap, Ointment and Talcum for daily toilet purposes. Touch pimples and itching, if any, with Cuticura Ointment, bathe with Cuticura Soap and hot water.

Stony Plain and District.

Weed Inspector T Graden was doing the rounds this week, giving the farms of Inga municipality the once-over.

Richard Senitzsch, a young man who had worked a week for each of several farmers in the district, was committed for trial on Saturday at a preliminary hearing, when he was charged with the theft of a sum of money from Mr P M Evjen, of Rosenthal district. He had departed for the City before the theft was discovered. When the loss was reported, Const. Smith motored to the City, and, after an exciting chase, succeeded in capturing Richard.

Mr H T Walton has purchased a purebred Poll Angus bull, for use in his herd.

Mr J L Kennedy, the new proprietor of the summer resort at South Edmonton Beach, has been making improvements at this popular resort. There are a few cottages to rent here, by the month or season.

Practice at Comet Range has commenced. At the opening shoot, Mr J Smith made a 31 and a 32 out of possible 35's.

The straight shooters at Holborn have organized a rifle club, with a goodly membership. It is proposed to locate the new range on the Kimmery Ranch, on the river bank.

The Reform Church edifice at Glory Hills is undergoing repairs at present. Contractor Pailer has raised the building and put in a cement foundation. A new heating system will be installed.

Holborn U. F. W. A. are giving a dance at Holborn Hall Friday July 8. Bartha's orchestra.

Dr G B Thurston, dentist, is taking a vacation at present and will discontinue his trips to Stony for a short time. He will resume his practice the latter part of July.

Sporting Notes.

The prediction made in last week's Sun that Stony's Senior ball team would win a game came true just after the paper was off the press. They played a team from Holborn on the local grounds. The game proved to be a gallop around the bases, on the smack-and-run principle, each team striving to get a dozen runs to its credit. Stony's players came nearest to this desideratum, with 11. The visitors succeeded in securing 10 runs.

Stony's line-up: R M Oatway, Lory, Moyer, Wildman, Rosenau, Joe Ulmer, McCulla, L. Enders, T. Dick.

Stony's Senior ball team was prevented from keeping their engagement at Duffield on Sunday, owing to the rain storm.

Muir Lake Dance.

Muir Lake's big summer event took place Friday evening last, with everyone present, including delegations from Onoway, Calahoo, Edmonton, Spruce Grove and Stony. The music was provided by Mrs Kettle and Mr Calahoo. Alce Zieier was floor manager, and the refreshments consisted of lemonade and—lemonade. During the intermission a very fine stepdance was given by Mr Calahoo. A feature was the large number of charming young ladies who never missed a dance. There are numerous requests for a repeat order.

The above may be examined and bought at Mr J F Clarke's old residence.

E J. KIBBLEWHITE.

Inga Councillors Meet

Inga M.D. Councillors met in Stony Plain Friday last, June 17th, with Reeve McKinlay in the chair. That hardly monthly the Herd Law was up again for discussion; this phase being the third reading, and final passing of the Bylaw. The Herd Law will now come into effect as soon as its provisions have been approved of by the Minister of Agriculture.

The amendments to the Herd Law, as the latter affects part of divisions 2, 3 & 4, was then taken up by the Councillors, and, after some discussion, Secretary Pidgeon was instructed to take the necessary steps to have the vote taken by the resident ratepayers in the divisions noted.

Mr Tom Bell, of the Russell road machinery works, was present, and engaged the attention of the councillors for a short time, speaking on behalf of the company he represents and the line of goods it produces. It is understood several fresnos will be ordered, if these are found to be necessary when carrying out the road-making program.

A delegation was present from Stony Plain Municipality, asking for a grant from Inga Council toward the Jubilee celebration in Stony, on July first. A grant of \$100 was passed.

A very extensive program for road work in the several divisions is being arranged for by the Councillors.

Spruce Grove News

The Winterburn baseballers play a return game with the Grove team, here, on Sunday afternoon next.

The members of Spruce Grove Community Club met last week, to arrange for the annual picnic. The following committee has the matter in hand: Dave Bell, Joe D Miller, Jac Brox, J. Elder.

Rudey Heichen has gone to Fort Saskatchewan, to engage in elevator construction work.

The farmers hereabouts are beginning to get optimistic, the recent rains, alternating with warm spells, making splendid growing weather for the crops. The more optimistic of them claim that, in spite of the late spring this year, the crops are as far advanced now as at the same date in 1926. Given a good fall, it is believed there will be a bumper crop.

Work on the roads is now in progress in several of the divisions of this municipality.

Mr Ph Schram is now operating his sawmill on the Gabel place, northeast of town. The outfit will have a long run, with about eight settings of logs ahead of it.

M Mecklenburg, eyesight specialist, will be at Spruce Grove Wednesday, June 20.

Railway Time Table.

Going east—Every morning at 6.55 except Tuesday,
Going west—Every night at 10.35 except Sunday.

PASTURE!

For a few more head of town Cows; \$1.25 a month, payable in advance. Apply A. Alt, Stony Plain.

The Logical Choice of the Two-Car Family

THERE are many reasons for the choice of a Chevrolet in the two-car home—in its dependability in all weathers and under all conditions—in its quick response, ease in handling, and its trouble-free liability appearing to the floor later. The many improvements first introduced in low-priced cars by Chevrolet and a car worthy of service to those who also own the finest of cars. More and more the owners of big cars are now turning to Chevrolet for a second car.

The Most Beautiful Chevrolet in Chevrolet

History with its Fisher-built Body—in Deep color—in lines of mechanical refinement—clothing of silver, air cleaner and many others—its selling at new, low prices, the lowest for which Chevrolet has ever been sold in Canada.
